

Not the usual handcraft! **NEW DRUM**

Catalogue of September 2021

www.newdrumpercussion.com

New Drum is a young italian firm born in 2020, based on a **new model of craftsmanship** halfway between tradition and innovation.

New Drum makes **professional percussion instruments** with care and passion for drummers, using only products 100% made in italy.

The idea of combining **traditional materials**, such as solid wood, and **innovative materials**, such as epoxy resin, comes from the desire to offer **modern** and **performing** instruments, different from the ordinary products and offers of traditional artisans.

Our **goal** is to make available to the cutting-edge drummers a **wide choice** of original and modern sounds and instruments for their drumset, able to bring out their **originality** and their **performance**.

We care very much about the active participation of the drummers in the production, encouraging the creation of **unique** products, **personal** and **individual**, with excellent aesthetic and sound qualities.

Practice Pad

- **Silent:** you can practice without disturbing;
- **Bounce:** the passage of the execution of the exercises from the pad to the drum will be immediate because you'll not need to get used to the different surfaces;
- **Accelerated performance improvement:** the semi-soft surfaces requires more effort, the training will be even more intensive and effective.

Technical details

Practice Pad 10" with semi-soft rubber, the base is made of wood and decorated with acrylic pouring technique and finish made with glossy epoxy.

On the back has been applied an anti-slip and anti-noise rubber ring.

With each New Drum pad is included a comfortable bag with which you can carry the pad without risk of damaging it.

Technical details

Practice Pad 8" with semi-soft rubber, the base is made of solid wood and epoxy resin with glossy finish.

The small surface is excellent for focusing on accuracy of the shots.

With the protruding rim you can train your rimshot directly on your pad.

On the back has been applied anti-slip and anti-noise rubber mounts.

New Drum Tools

New Drum also offers a range of accessories for the drumset.

All accessories are made to enrich the drum set with shades and colored accents.

The New Drum Tools don't have a specific function but leave free space to the creativity of the drummer who can decide how and where to place it, some accessories also offer a double functionality.

Technical details

The Modular B20 is an acoustic tool with an electronic sound, it doesn't clutter and you can place it on the cymbal stand and it doesn't need cables or software for its amplification.

Sound can be modulated by moving the wing nuts on the top. You can get a more open and prolonged sound loosening the tightening of the wing nuts.

It's made of a solid wood base compatible with professional and semi professional M8 cymbal stand, two hand-hammered steel slabs, one B20 slab and two B20 rattles.

Size: about 15 cm x 5 cm X 4 cm.

Modular B20

Modular Steel

Technical details

The Modular Steel is an acoustic tool with an electronic sound, it produces a dry and acid sound very similar to the sound of a sample hihat

It can also be used as an effect to enrich the sound of your drum set or as a second hihat for those who have space problems or don't have a suitable cymbal stand.

It's made of a solid wood base compatible with M8 cymbal stand, three hand-hammered steel slabs and two steel rattles.

Size: about 15 cm x 5 cm X 4 cm.

Technical details

The Punch Stack is an indispensable "ready to use" instrument for those who want to integrate electronic sounds to their drumset, without having to use cables, DAW and amplifiers.

Despite is an acoustic instrument, the Punch Stack produces a sound similar to that of a sample snare drum.

The Punch Stack is composed of three hand-hammered steel cymbals: 8", 10" and 12".

Clap Stacks

A close-up photograph of a black, rectangular damper device mounted on a drum head. The drum head is black with white text that reads "NEW DUMP" in a bold, sans-serif font. The damper is positioned over the drum head, and its base is secured by a black strap with a textured, woven pattern. The background is blurred, showing the metallic rim of the drum.

New Dump

- Full control on the overtones and sustain of your drums;
- Two sizes available: small and large damper;
- Easy and fast to mount and remove;
- -The New Dump kill the overtones, attenuate the harmonics and cut off those nasty release.

Technical details

New Dump Large
medium/heavy damping.

New Dump Small
medium/light damping.

It's longer-lasting than gel and tape and is more durable when subject to dirt, sunlight and frequent displacements;

The metal locking system with screw clamping is stable and safe.

The New Dump doesn't lose the attack because it's not glued to the drumhead.

It looks much cleaner and more professional than gels and tapes.

The on-off system allows you to easily activate and deactivate the effect of the New Dump.

You can modulate the sound and choose the right level of damping by blocking one or both flaps of the damper

Simple and comfortable activation and deactivation system, compatible with most of the hoops on the market, with an anchor range from 1 mm to 8 mm.

The New Damper are made of light fabric able to drastically dampen the overtones and unwanted frequency, giving it a "fat" sound.

The label with the logo allows you to easily remove them from the drums.

Two models are available: Medium and Light, choose according to your needs and the degree of damping that you want to get.

Sizes available: 10", 12", 13", 14", 16".

Light Damper

- They are easy to put, remove and transport
- soft and warm volumes without annoying buzzes.
- The New Damper can be folded on itself so you can decide how to attenuate the volume and attack
- with these dampers the drum heads will last longer because they are protected from the shots of the drum sticks;
- Sizes available: 10", 12", 13", 14", 16".

- They are made of thick fabric able to drastically dampen the overtones and unwanted frequency;
- the central hole has been designed for those who want to get a controlled and warm sound without losing the attack;
- is reinforced with a steel core that prevents the deformation of the shape;
- for this type of damper the texture of the fabric may vary.

Chain Bells

Technical details

Ideal accessory for hi-hat.

2.5 mm steel chain with ten iron bells.

The effect enriches the sound with particular accents and nuances.

It can be placed on any component of the drumset, obtaining different effects depending on the combination chosen.

Technical details

It has a double function: key chain and accessory for drum set.

Noise Key Chain increases the sustain and adds a "Trashy" sound.

It can be placed on any cymbal to experience different sounds depending on the combination chosen.

Noise Key Chain

Sizzle Chain Ride

Technical details

The New Drum Sizzle Chain Ride are a kind of removable rivet that, through a leather ring, can be used on any cymbal.

It allows you to increase the groove and sustain of the cymbals even without drilling them.

The length of the chain is about 25 cm and it's made of brass, excellent material for its high resonant qualities.

Gallery

**Pads 8" in epoxy resin and
medium-density rubber**

**Fluid Art Pads 10" with
medium-density rubber**

General information

The products in this catalogue represent the New Drum range currently in production.

Each product is complete with its reusable and eco-sustainable packaging, it includes: a tnt bag, a sticker and a thank you card with a voucher code.

In the following months we'll add new products we are working on.

We'll update the catalog and, if you're interested, we'll send you the new document to your mailbox.

We really hope you enjoyed,
Thank you for your attention!
